

MICROBIOLOGY
495, 499 Petition Form

The department of Microbiology will sometimes offer 495 or 499 credit for projects done with faculty that are outside of the department of microbiology. In all such cases, there is an expectation that if credit is to be awarded from the Microbiology Department, the work that is being done must be Microbiological in nature. In order for the curriculum committee to evaluate this request, we need the information below. In addition, in order for faculty members outside of our department to receive faculty load credit for supervising 495, or 499 students, we will need the Employee ID number of the mentor. If you have questions, please contact Josey Overfield, Academic Adviser, Department of Microbiology – microadv@uw.edu

Student Name	Email Address	Student Number
--------------	---------------	----------------

Faculty Sponsor Name <i>(Please Print)</i>	Email Address	Department
--	---------------	------------

Faculty Employee ID Number (9-digit number)

Circle:

MICROM 495 **MICROM 499**

Description of research project (to be completed by student):

- 1) **Summary of the project goals and relationship to microbiology:**

- 2) **Analytical and laboratory techniques that will be used/learned in this project**
