

MICROBIOLOGY

Bachelor of Science

Microbiology is the study of the smallest living organisms (bacteria, algae, fungi, and protozoa) and viruses. Because of their simplicity and rapid growth rates, microorganisms are readily amenable to study in the laboratory. Because their cellular processes closely resemble those of higher organisms they are ideally suited for fundamental studies of biological structure, physiology, metabolism, genetics and development. The Microbiology department at the University of Washington works mainly in cutting edge research in Bacteria and Viruses.

The B.S. in Microbiology is complemented by the College of Arts and Sciences general educational requirements such as English Composition, Writing, Foreign Language, Quantitative & Symbolic Reasoning, Visual Literary & Performing Arts and Individuals and Societies courses which provide a comprehensive liberal arts degree.

For Admission to the program, students must complete the following requirements:

1. A minimum of 75 credits applicable to graduation, with a minimum cumulative GPA of 2.0 overall, and a minimum cumulative GPA of 2.5 in prerequisite chemistry and biology courses listed below. Most students are admitted to the major at the beginning of their junior year.
2. Completion of the following pre requisite courses:
 - BIOL 180, 200 (minimum 2.3 grade) , 220
 - CHEM 142, CHEM 152, CHEM 162 AND CHEM 223 OR CHEM 237

All students are strongly encouraged to meet with the Microbiology Adviser before declaring and at least quarterly after acceptance to go over academic progress, academic goals and department policies.

Counseling Services Coordinator	Office: Health Sciences Building K-Wing 343A	Phone: 206-543-2572 Email: Microadv@uw.edu
--	---	--

Grade Requirements:

1. All courses taken to fulfill requirements must be taken for a letter (numerical) grade unless the course is offered credit/no credit.
2. Students must maintain a cumulative GPA of 2.25 and a minimum grade of 1.8 in all required and elective MICROM courses used toward graduation to receive their degree.

Progress/Dismissal Policy:

Students enrolled in the B.S. degree program must maintain the above mentioned GPA requirements.

A student will be placed on departmental academic probation when either of the following occurs:

1. The student’s cumulative GPA in all core and distribution MICROM courses falls below a 2.25. The student is placed on probation for one quarter. If at the end of the quarter, the GPA has not improved to at least the 2.25, the student will be dropped from the major. Students who experience extraordinary circumstances may petition for one or more additional probationary quarters.
2. In a given quarter, if the student receives a grade of less than 1.8 in one or more core or distribution MICROM courses. The student remains on probation until the course is repeated with a grade of 1.8 or, in the case of a distribution course, another course in the same category is taken with a grade of at least 1.8. A student who receives a grade of less than 1.8 in any core or distribution MICROM course while on probation will be dropped from the major.

MICROBIOLOGY

Bachelor of Science

CHEMISTRY - Choose One Option:

1. **CHEM 142, 152, 162 (5, 5, 5) AND CHEM 223, 224 (4, 4)**
2. **CHEM 142, 152, 162 (5, 5, 5) AND CHEM 237, 238, 239 (4, 4, 4)**

Only the first organic chemistry course is required. Organic chemistry labs are not required for the major. Students may also use Honors chemistry sequences to fulfill major requirements.

BIOCHEMISTRY: Choose One Option:

1. **BIOC 405, 406 (3, 3)**
Intro to Biochemistry I & II
2. **BIOC 440, 441, 442 (4, 4, 4)**
Biochemistry I, II, III

Please note that CHEM 224, 238, and 239 are not required but may be needed, depending on which BIOC series you wish to pursue and your goals for post graduate work.

BIOLOGY

1. **BIOL 180, 200**, 220 (5, 5, 5)**
Introductory Biology I, II, III

*BIOL 200 requires a grade of 2.3 for the major.

*BIOL 200 requires CHEM 152 as a pre-requisite or co-requisite.

MATHEMATICS – Choose One Option of the five below:

Calculus:

1. **MATH 112 (5)**
Application of Calculus to Business and Economics
2. **MATH 124 (5)**
Calculus with Analytic Geometry I

Statistics:

3. **Q SCI 381 (5)**
Introduction to Probability and Statistics
4. **STAT 220 (5)**
Principles of Statistical Reasoning
5. **STAT 311 (5)**
Elements of Statistical Methods

Please note that calculus series is strongly recommended for students pursuing graduate work. MATH 124, 125, 126 (5, 5, 5)

Also acceptable QSCI 291, 292 AND Q SCI 381 (5, 5, 5)

PHYSICS – Choose One Option:

1. **PHYS 114, 115 (4, 4)**
General Physics I & II
2. **PHYS 121, 122 (5, 5)**
Mechanics, Electromagnetism

Freshman Year: Typically students will complete Inorganic Chemistry and Math requirements this year along with other general education requirements.

Sophomore Year: Students should complete Introductory Biology, begin Organic Chemistry and continue general education courses.

Junior and Senior Years: Students will typically start MICROM core and distribution courses, start Physics or Biochemistry, participate in research, finish any remaining general education requirements, or graduate or professional school requirements.

MICROBIOLOGY

Bachelor of Science

Microbiology Core and Distribution Courses:

MICROM CORE (8 Credits):

1. **MICROM 410 (3) Fundamentals of Microbiology** *Fall*
2. **MICROM 402 (3) Fundamentals of General Microbiology Lab** *Fall, Spring*
3. **MICROM 496 (2) Library Research Paper** *all quarters*

Distribution Courses:

- Total of 28 Credits from the following distribution groups AND electives.
- Choose **ONE** course from each of the **FOUR** distribution groups
- Two courses must have a lab component

1. Medical Microbiology

IMMUN 441 (4) Immunology *Fall*

MICROM 442 (3) Medical Bacteriology Lecture *Winter*

MICROM 443 (3) Medical Bacteriology Lab *Fall, Winter*

MICROM 460 (3) Medical Mycology and Parasitology Lecture *Spring*

MICROM 461 (2) Medical Mycology and Parasitology Lab *Spring*

2. Virology

MICROM 445 (3) Medical Virology *Spring*

MICROM 450 (3) Molecular Biology of Viruses *Winter*

3. Diversity and Ecology

MICROM 412 (3) Prokaryotic Diversity *Spring*

MICROM 435 (3) Microbial Ecology *Autumn*

ENV H 409 (3) Microbiome & Environmental Health *Spring*

4. Genetics and Molecular Biology

MICROM 411 (4) Bacterial Genetics w/ Lab *Winter*

MICROM 431 (3) Prokaryotic Recombinant DNA Techniques Lab *Winter PLUS*

GENOME 361 (3) Fundamentals of Genetics and Genomics *all quarters OR*

GENOME 371 (5) Introductory Genetics *Fall*

2 Lab Courses:

MICROM 411

MICROM 431

MICROM 443

MICROM 461*

(*requires 460)

IT IS YOUR RESPONSIBILITY TO REGULARLY ASSESS YOUR DEGREE PROGRESS BY REFRESHING AND CHECKING YOUR DEGREE AUDIT. Should you have a question or notice a discrepancy, it is your responsibility to address this with a Department of Microbiology Adviser. This list is not a comprehensive handout of your requirements, you must consult your degree audit.

Please see the department website for the following:

- Departmental Honors Option (2 quarters of MICROM 495 and MICROM 496 based on your work)
- Department Awards and Scholarships (available fall and spring quarters to declared majors)
